

Asian and Latino Immigrants in a Restructuring Economy: The Metamorphosis of Southern California

Experiencing both the enormous benefits and the serious detriments of globalization and economic restructuring, Southern California serves as a magnet for immigrants from many parts of the world. This volume advances an emerging body of work that centers this region's future on the links between the two fastest-growing racial groups in California, Asians and Latinos, and the economic and social mainstream of this important sector of the global economy. The contributors to the anthology—scholars and community leaders with social science, urban planning, and legal backgrounds—provide a multi-faceted analysis of gender, class, and race relations. They also examine various forms of immigrant economic participation, from low-wage workers to entrepreneurs and capital investors. *Asian and Latino Immigrants in a Restructuring Economy* documents the entrenchment of various immigrant communities in the socio-political and economic fabric of United States society and these communities' role in transforming the Los Angeles region.
