This CD-ROM is not only an excellent learning tool to master VBA but also a gold mine for very powerful and useful macros. It has more than 1,200 PowerPoint slides that guide you through the learning process and comes with Excel files for you to work on as well as files that have the VBA code all done. Developed and tested for business training, this CD-ROM is ideally suited for self-instruction using a screen shot approach versus an overabundance of text. More than 1,400 slides, with examples drawn from actual cases, are divided into three modules covering VBA basics, how to calculate with VBA, and letting VBA interact with the user.
