

# Advances in Marine Antifouling Coatings and Technologies (Woodhead Publishing Series in Metals and Surface Engineering)

Marine biofouling can be defined as the undesirable accumulation of microorganisms, algae and animals on structures submerged in seawater. From the dawn of navigation, marine biofouling has been a major problem for shipping in such areas as reduced speed, higher fuel consumption and increased corrosion. It also affects industries using off-shore structures such as oil and gas production and aquaculture. Growing concerns about the environmental impact of antifouling coatings has led to major new research to develop more environmentally-friendly alternatives. Advances in marine antifouling coatings and technologies summaries this wealth of research and its practical implications. This book is divided into four sub-sections which discuss: marine fouling organisms and their impact, testing and development of antifouling coatings, developments in chemically-active marine antifouling technologies, and new surface approaches to the control of marine biofouling. It provides an authoritative overview of the recent advances in understanding the biology of fouling organisms, the latest developments on antifouling screening techniques both in the field and in the laboratory, research on safer active compounds and the progress on nontoxic coatings with tailor-made surface properties. With its distinguished editors and international team of contributors, Advances in marine antifouling coatings and technologies is a standard reference for manufacturers of marine antifouling solutions, the shipping industry, oil and gas producers, aquaculture and other industries using offshore structures, and academics researching this important area. Assesses marine antifouling organisms and their impact, including a historical review and directions for future research. Discusses developments in antifouling coatings examining chemically-active and new

surface approachesReviews the environmentally friendly alternative of safer active compounds and the progress of non-toxic compounds

Advances in Marine Antifouling Coatings and Technologies (Woodhead Publishing Series in Metals and Surface Engineering) (2009-06-05) Hardcover 1643.ADVANCES IN MARINE ANTIFOULING COATINGS AND TECHNOLOGIES WOODHEAD. PUBLISHING SERIES IN METALS AND SURFACE ENGINEERING.Advances In Marine Antifouling Coatings And Technologies Woodhead Publishing Series In. Metals And Surface Engineering Pdf. Advances In MarinePhysical Sciences and Engineering .. Adsorption of Metals by Geomedia 1998 Book Advanced Cardiac Imaging A volume in Woodhead Publishing Series in . Advanced Techniques for Assessment Surface Topography 2003 Book .. Advances in Marine Antifouling Coatings and Technologies A volume inADVANCES IN MARINE ANTIFOULING COATINGS AND TECHNOLOGIES WOODHEAD. PUBLISHING SERIES IN METALS AND SURFACE ENGINEERING.Buy Advances in Marine Antifouling Coatings and Technologies (Woodhead Publishing Series in Metals and Surface Engineering) by Claire Hellio, DiegoPrice, review and buy Advances in Marine Antifouling Coatings and Technologies (Woodhead Publishing Series in Metals and Surface Engineering) at best5 days ago billion annually to prevent and control marine biofouling. Biofouling . woodhead publishing series in metals and surface engineering PDF and S. Malinox Advances in marine antifouling coatings and technologies Edited and D.M. Yebra Maraging steels W. Sha and W. Gao Surface engineering of light 2013 Woodhead Publishing Series in Metals and Surface Engineering xvii.ADVANCES IN MARINE ANTIFOULING COATINGS AND TECHNOLOGIES WOODHEAD. PUBLISHING SERIES IN METALS AND SURFACE ENGINEERING.ADVANCES IN MARINE ANTIFOULING COATINGS AND TECHNOLOGIES WOODHEAD. PUBLISHING SERIES IN METALS AND SURFACE ENGINEERING.Advances In Marine Antifouling Coatings And Technologies Woodhead Publishing Series In. Metals And Surface Engineering Pdf surface hydration: principlesThe Woodhead Publishing Series in Metals and Surface Engineering is a collection of reviews on all the major research and technological developments in surface engineering, and the solutions offered by surface treatments and engineering coatings. .
